Hi, Beth.

I apologize for the delay in responding to your email. I am assuming you are referencing the Columbia Falls Aluminum Reduction Plant, in Columbia Falls, Mont. I spoke with the project manager for the site. He doesn't believe an ecological risk assessment was done during the site assessment phase, but he said that one will be done as part of future site investigation and cleanup activities.

Please let me know if you have additional questions or would like more information.

Best regards,  
Cynthia Peterson

Ms. Peterson

I am a student at Texas A&M university. I am doing a class project. I am writing in regards to the Anacanda Aluminum Co superfund site on the NPL. I was looking on the EPA regional site and found your name associated with the site.

I wanted to know if an ecological risk assessment had been done on the site or if one is being planned for in the future? Can you provide me with that information?

Thank You for your time,  
Beth Sabin
